

# Hire Rite Temporary Fence

Temporary Pool Fence • Construction Fence • Event Fence

## Swimming Pool Fence

- Has the pool been fully enclosed with fence over 1.2m high (measured from the outside of the pool area)
- If part of the fence is a boundary fence then ensure that fence is over 1.8m, if not then completely enclose pool with temporary pool fence.
- Check that no other structures are within the pool fence area such as a garage, shed, deck, patio, bbq area etc
- Check that the fence does not adjoin a building where there is a window or door into the pool area.
- Is the gap under the fence less than 100mm
- Are the all gaps less than 100mm
- Are all fence panels secured and/or clamped

## Swimming Pool Gate

A pool gate is required if the pool is going to be used while temporary fence is still in place.

Y / N Has a pool gate been installed, if yes then complete following checklist

- Is the gate a minimum 1.2m in height?
- Does the gate open away from the pool area?
- After being opened, does the gate swing back to the closed position on its own?
- Does the gate latch automatically
- Is the release button for the gate latch located at least 1.5m in height from the finished ground?
- Is the gate secure and doesn't open even if a child were to climb on it?
- Are all gaps between the gate, the fence and the ground less than 100mm?

## Around the Swimming Pool Fence

- Is the outside of the pool fence for a distance of 900mm clear of any objects that a child might use to climb the fence?
- Is the inside of the pool fence clear of any objects that a child might use to climb the fence?

## Disclaimer

Hire Rite Temporary Fence will make all efforts to install the fence to comply with the Swimming Pool Act and Regulations. During the construction of a pool it is the home owners responsibility to ensure that the integrity of the installation is maintained.
