

Hire Rite Temporary Fence

Temporary Pool Fence • Construction Fence • Event Fence

Swimming Pool Fence

- Has the pool been fully enclosed with fence over 1.2m high (measured from the outside of the pool area)
- If part of the fence is a boundary fence then ensure that fence is over 1.8m, if not then completely enclose pool with temporary pool fence.
- Check that no climbable objects are within 900mm from the top of the fence (Inside and Outside)
- Check that the fence does not adjoin a building where there is a window or door into the pool area.
- Is the gap under the fence less than 100mm
- Are all gaps less than 100mm
- Are all fence panels secured and/or clamped

Swimming Pool Gate

A pool gate is required if the pool is going to be used while temporary fence is still in place.

Y/N Has a pool gate been installed, if yes then complete following checklist

- Is the gate a minimum 1.2m in height?
- Does the gate open away from the pool area?
- After being opened, does the gate swing back to the closed position on its own?
- Does the gate latch automatically
- Is the release button for the gate latch located at least 1.5m in height from the finished ground?
- Is the gate secure and doesn't open even if a child were to climb on it?
- Are all gaps between the gate, the fence and the ground less than 100mm?

Around the Swimming Pool Fence

- Is the outside of the pool fence for a distance of 900mm clear of any objects that a child might use to climb the fence?
- Is the inside of the pool fence clear of any objects that a child might use to climb the fence?

Disclaimer

Hire Rite Temporary Fence will make all efforts to install the fence to comply with the Swimming Pool Act and Regulations. During the construction of a pool it is the home owners responsibility to ensure that the integrity of the installation is maintained.
